

How to fit EGR blanking plate on Mazda BT-50 (2006-2011), Ford PJ, PK Ranger

Mazda BT-50 (2006-2011)
Ford PJ, PK Ranger
EGR Blanking Plate
2mm thick marine grade stainless steel

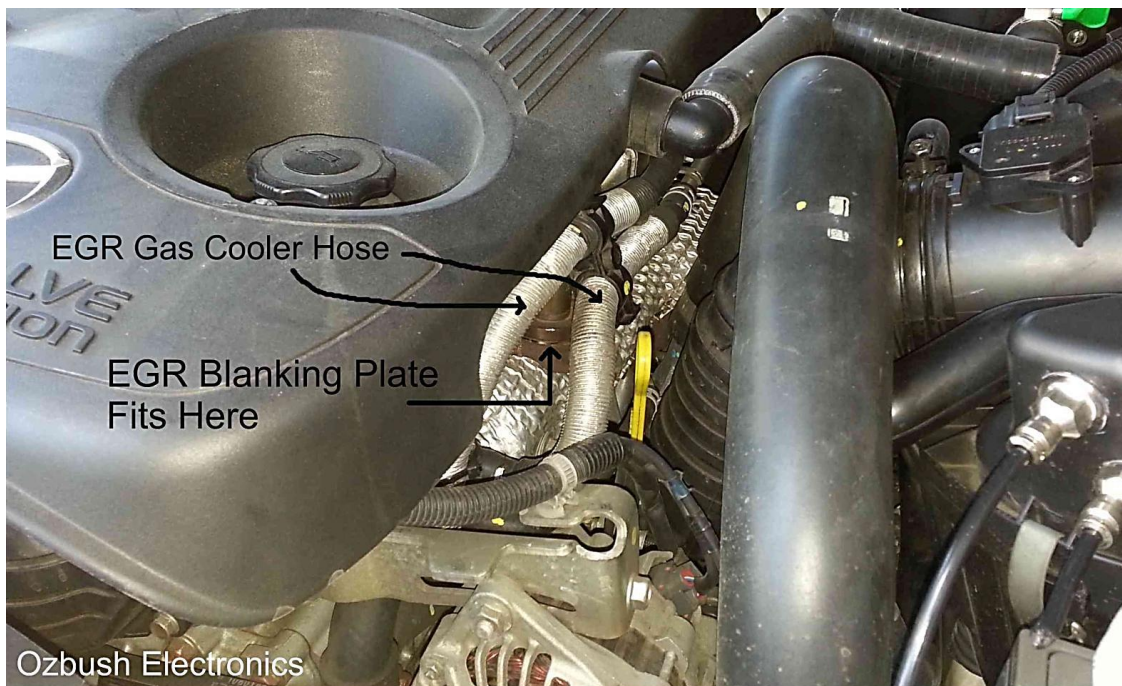

The EGR Blanking Plate.

You can buy them plenty in EBay. You may also purchase it from Ozbush Electronics. Unlike other brand of engines, the Mazda/Ford diesel engines are quite easy to fit the EGR blanking plate.

Caution!

EGR gas cooler pipes are somewhat fragile please take care not to crack neck of the pipe. Do not force any pipes in the EGR gas cooler.

1. Remove the plastic engine cover.
2. Remove a black plastic hose clamp which holding two hoses to EGR gas cooler.
(To secure larger working space).
3. Loosen the two bolts holding EGR gas cooler.
4. Undo the two bolts which holding the EGR gas pipe flange to the exhaust block.
5. Lift EGR pipe flange up few millimetres and slide EGR blanking plate in.
6. Tighten up the flange bolts and cooler bolts.
7. You don't need any sealant. It should be done within 30 minutes.

Also consider blocking the two hoses at the EGR cooler to protect the engine in case of cooler leak.

Please note: Above Modifications are used only for private land, off road or racing. It may not comply with current emission standard set by government authority.
